8-Stops per spool

Smart Stop™ is the revolutionary new high performance bobber stop that attaches without having to cut your line!

• Fastest to attach - no cutting line

Smart Stops are the world's fastest-to-attach bobber stops. No need to cut or thread anything onto the line. Simply insert the line and close!

• Nice grip, nice slip

Inside each **Smart Stop** is a special **Smart Grip** system which, when closed, creates a nice grip!

• Easy to move - won't twist line

When it's time to change depths, **Smart Stops** are easy to slide up or down your line and, unlike thread-style stops, they won't twist your line!

• Won't get caught on rod guides

Smart Stops are tapered on both ends, which allows for them to easily move through rod guides without getting caught!

Smart Stops come 8 to a spool

How Smart Stops work ...

1. Run line through slot on **Smart Stop**
2. Snap **Smart Stop** closed with fingers or pliers
3. Twist off **Smart Stop** from star spool
